

**Before the
Federal Communications Commission
Washington, D.C. 20554**

In the Matter of

Amendment of the Commission's Space
Station Licensing Rules and Policies

IB Docket No. 02-34

ERRATUM

Released: July 23, 2003

1. On July 8, 2003, the Commission released a *Third Report and Order and Second Further Notice of Proposed Rulemaking* in IB Docket No. 02-34, revising the Commission's satellite licensing procedures.¹ Paragraph 40 is corrected by adding the follow language to the end of the paragraph:

In addition, consistent with the elimination of the fungibility policy, we require GSO-like applicants to specify only one orbit location in each application. On a going-forward basis, applicants seeking more than one GSO-like satellite must file one application for each satellite. Applicants proposing NGSO-like satellite systems, including systems of multiple GSO MSS satellites that are considered both "NGSO-like" with respect to its service links and "GSO-like" with respect to its feeder links, can continue to file for such multiple satellites in one application. Although certain Part 25 rules currently address licenses involving multiple GSO satellites, we are retaining those rules in their current form to address systems that are processed under the previous licensing system.²

2. In Appendix B of the *Third Report and Order and Second Further Notice of Proposed Rulemaking*, Section 25.114(a) is corrected to read as follows:

(a) A comprehensive proposal shall be submitted for each proposed GSO-like satellite, and for each NGSO-like satellite system, on Form 312, Main Form and Schedule S, together with attached exhibits as described in paragraph (d) of this section.

¹ Amendment of the Commission's Space Station Licensing Rules and Policies, *First Report and Order*, IB Docket No. 02-34, FCC 03-154 (released July 8, 2003) (*Third Space Station Reform Order*).

² 47 C.F.R. § 25.145(f).

3. In Appendix E of the *Third Report and Order and Second Further Notice of Proposed Rulemaking*, Question 29 of Form 312EZ is corrected to read as follows:

29. Alien Ownership: If you are a common carrier, can you answer "yes" to Questions a. through e.? If you are a non-common carrier, can you answer "yes" to Question a.?
